Received 25 January 2025; Final revision received 25 January 2025

The authors regret that the original version of our paper unfortunately contained an incorrect representative image. The migration image of “SACC-LM-0h-shMUC1” group in Figure 4D which was used as control has been misused during image processing. The corrected image for original Figure 4 is below. The authors have repeated the experiments in Figure 4D and obtained consistent results with those in the article. The authors confirm that the corrections made in this erratum do not affect the original conclusions. The authors apologize for any inconvenience or misunderstanding that the error may have caused.
